

Thank you, Caren Adams, for donating 72 hours of support to Habitat efforts!

Q: What is the best part of volunteering for Habitat?

A: I like to see things get reused and not end up in a landfill, and I enjoy helping get the donations into someone else's home. And I like that people can get new things and get a second use out of items that have come in from someone else's donation.

Q: What have you gained from volunteering for Habitat?

A: I think that volunteering has brought me closer to this community. I've been able to help customers and this work has plugged me back into the community. I used to live here so this work has helped me get to know the people in the community and taught me what services are available so I can point people to those resources.

Q: What would you say to someone who wants to volunteer?

A: Oh, you should absolutely do it. I think it's very fulfilling work and I would encourage anyone to help out.
